The International Social Science Council (ISSC) is an independent, non-governmental organization and the primary international body representing the social, behavioural and economic sciences at a global level. It was founded by UNESCO in 1952.

The Council has a wide membership, from which it draws its strength and its role. ISSC members include:

- international disciplinary associations or unions;
- national academies of science or social science;
- national research councils;
- regional associations of social sciences; and
- other national and international agencies and foundations.

The ISSC's mission is to advance the social sciences – their quality, novelty and utility – in all parts of the world and to ensure their effective global representation.

The Council works as a catalyst, facilitator and coordinator, bringing together researchers, scholars, funders and decision-makers from all parts of the world in order to promote global social science presence and authority, capacities and connectivity. This involves:

- promoting innovative, inter- and cross-disciplinary, comparative social science research and knowledge exchange;
- determining priorities for the future of international social science;
- providing global platforms to articulate, and strengthen, social science expertise on the most urgent questions of the day;
- strengthening social sciences in developing and transitioning societies;
- fostering international collaboration on the basis of equal partnerships;
- collecting, analysing and disseminating data on social science systems and resources, their availability and impact in different parts of the world;
- broadening inter-disciplinary collaboration among the social sciences, and expanding exchange and joint work between the social sciences, the humanities, natural and other sciences;
- linking social science knowledge effectively to public policies and local needs;
- advancing the social science literacy of citizens.

In addition to producing regular *World Social Science Reports*, key ISSC activities include the convening of World Social Science Fora, the co-sponsorship of international scientific programmes and research networks, as well as actions aimed at developing a future generation of world social science leaders.

The ISSC secretariat is based in Paris and directed by Heide Hackmann, Secretary-General.

The *2010 World Social Science Report* has been produced by an Editorial Team selected and appointed by the ISSC, and was led by Françoise Caillods, Senior Managing Editor.
